

# Human Experience Design Interactions

PROCESS MANAGEMENT AND PLANNING

**DESN 555**  
Computer Aided Graphics III (BLANCA)  
(3 units)  
Prerequisite: Graduate student in HXDI program or consent of instructor.  
Application of advanced techniques in computer-aided audiovisual multi-media, illustration, rendering, image manipulation and composition. Focus on multidisciplinary designs for 2D and 3D forms, virtual, physical and hybrid environments for user experience design.  
Letter grade only (A-F). Course requirements for technology hardware and software are available on the department web site. (Online, Hybrid or 6 hours laboratory). Double Numbered with: DESN 455

**DESN 570**  
Applied Design in Contemporary Society (LAFORTE)  
(3 units)  
Prerequisites: Graduate student in HXDI program or consent of instructor.  
Apply advanced analytical and professional-level skills to the communication media of contemporary society. Emphasis on individual research in context while creating original content for communication through contemporary design media. Learning evaluated through seminar participation, applied multi-media communication projects.  
Letter grade only (A-F). (3 hours seminar)

**DESN 581**  
Designing for User Experiences (SATTERFIELD)  
(3 units)  
Prerequisites: Graduate student in HXDI program or consent of instructor.  
Application of theories, research methods, ethics, and design processes of UX (user experience) design. Students will research, develop, and test UX designs. Design strategies will be discussed as they apply to physical, virtual, and hybrid solutions.  
Letter grade only (A-F). Course requirements for technology hardware and software are available on the department web site. (Online, Hybrid or 6 hours laboratory). Double Numbered with: DESN 481

**DESN 585**  
Human Experience and Social Design Seminar (BARKER)  
(3 units)  
Prerequisites: Graduate student in the HXDI program or consent of instructor.  
Prerequisite(s)/Co-requisite(s): DESN 555 or equivalent; DESN 570; DESN 581.  
Graduate seminar involving the social context and inter-disciplinarity of user experience including topics such as research-based, design-thinking processes, boundaries of spaces, objects, and interfaces. This course develops applied projects discussed in the seminar environment.  
Letter grade only (A-F). (3 hours seminar).

**DESN 582**  
Research Methods for Inclusive UX Design  
(3 units)  
Prerequisite: Graduate student in HXDI program or consent of instructor.  
Advanced application of theories, research methods, ethics, and design processes of inclusive UX (user experience) design. Research, development, and testing of UX designs for non-traditional user groups. Design strategies will be discussed as they apply to physical, virtual, and hybrid solutions.  
Letter grade only (A-F). Course requirements for technology hardware and software are available on the department web site. (Online, Hybrid or 6 hours Laboratory) Double Numbered with: DESN 482

**DESN 583**  
Data and Technologies of Human Interaction Design  
(3 units)  
Prerequisite: Graduate student in HXDI program or consent of instructor.  
Technology skills for non-programmers by managing and processing complex visual information. Students will synthesize quantitative and qualitative data through a series of workshops, and develop digital research skills and technology to enhance human-centered, technology-augmented design.  
Letter grade only (A-F). Course requirements for technology hardware and software are available on the department web site. (3 hours seminar). Double Numbered with: DESN 483

**DESN 586**  
Human Experience and Embodied Interactions Studio  
(3 units)  
Prerequisites: Graduate student in the HXDI program; DESN 555 or equivalent; DESN 570; DESN 581; DESN 582 or equivalent; DESN 583; DESN 585; or consent of instructor.  
Engages collaborations from various specializations in design to develop projects focused on human experience and embodied interactions. Hands-on, collaborative projects are developed with the research and theory required to foster innovative and independent solutions.  
Letter grade only (A-F). (3 hours laboratory).

**DESN 686**  
Immersive Design Research Lab  
(2-6 units)  
Prerequisites: Graduate student in the HXDI program; DESN 555 or equivalent; DESN 570; DESN 581; DESN 582 or equivalent; DESN 583; DESN 585; or consent of instructor.  
Technical and applied human experience design interaction work within the Immersive Design Research Lab.  
Letter grade only (A-F). (2 hours laboratory per unit).

**DESN 554**  
Technologies for Hybrid Design  
(3 units)  
Prerequisite(s): Graduate student in HXDI program or consent of instructor.  
Design of physical objects, environments and experiences that generate, employ or are otherwise integrated with digital information.  
Letter grade only (A-F). Course requirements for technology hardware and software are available on the department web site. (6 hours laboratory). Double Numbered with: DESN 454

**DESN 698**  
Human Experience Design Interactions Master's Project  
(4-6 units)  
Prerequisite(s): Graduate student in the HXDI program; DESN 555 or equivalent; DESN 570; DESN 581; DESN 582 or equivalent; DESN 583, DESN 585; Advancement to Candidacy, minimum of 24 units and consent of program coordinator.  
Demonstrates advanced methods and applications of human experience and interaction design in project form. Emphasis on individual research, original content, communicating and demonstrating that work. Learning evaluated through mentor, faculty assessment.  
Letter grade only (A-F). Course requirements for technology hardware and software are available on the department web site. (4-6 hours seminar).
