

Updated Timeline for Restoration of Drinking Fountains

December 5, 2017 - **Complete**

All fountains in buildings built after 1990 will be placed back in service after being tested and cleared.

All outdoor drinking stations will be placed back in service after being tested and cleared. The softball field's visiting team dugout fountain will remain off until replaced.

All drinking fountains and kitchen faucets in the Child Development Center, Family and Consumer Sciences buildings, and drinking fountains in the Student Union and Research Foundation buildings have been cleared and will be placed back in service.

December 5 - 22, 2017 - **Complete**

Water testing on drinking fountains in buildings built before 1990 will be conducted utilizing EPA-approved test kits. All fountains passing this test will be returned to service, and will be tested annually until they can be replaced. Units that fail the test will remain out of service and replaced.

December 20, 2017 to January 22, 2018 - **Complete**

Drinking fountains in the Child Development Center, the Family Consumer Sciences Building will be replaced with filtered hydration stations.

January 22 to April 15, 2018 – **On-going**

Filtered hydration stations will be installed on the first floor of buildings currently without hydration stations. Two exterior drinking fountains for the Softball Field will be replaced.

2018 - 2020 - **Planned**

Remaining drinking fountains within buildings will be replaced with filtered hydration stations.
