SHAKE N' Inc.

Shake N' not Scrubbed

Long Beach, California – February 2023

Look out customers! The cleaning industry has gained a competitor. Shake N' Inc.'s new and improved water bottle cleaner is making its way to a shelf near you.

With Shake N' Inc's. new management team, CEO Anna Rad, CFO Alejandro Robles, COO Juan Gomez, CIO Allura Jackson, and VP of Marketing Brenda Acosta, comes new changes to our flagship product, the Shake N' Clean.

For those unfamiliar, our product is an all-natural and eco-friendly cleaner tablet used to clean reusable water bottles. Our product will still perform the same way; get your bottle, add water, drop in the tablet, shake, dump, and rinse, but it will now include an added silicone ball to place the tablet in to help you reach all the nooks and crannies.

We have updated our mission, goal, and vision statements to align with our new values:

- ◇ Our Mission: Provide a product that helps to give water bottle users an easy and efficient way to clean their containers.
- ◇ Our Goal: Reduce the amount of single serve water bottles and provide an eco-friendly cleaner for reusable containers.
- ◇ Our Vision: A world in which it takes 30 seconds or less to have a clean water bottle to consume beverages out of.

As we go into our third year of business, we are looking forward to continuing to innovate and improve our product to meet our customers' expectations. We already have some ideas for future growth and development and are already working on a line extension that we hope to release in the next few years.

We are looking forward to a Shake N' good time!

-Shake N' Inc.
