

DULCE GOGUE-HERNÁNDEZ (SENIOR RESEARCH ASSISTANT)

My name is Dulce Gogue-Hernandez, and I am a current linguistics undergraduate student at California State University, Long Beach (CSULB), and a research assistant currently working in the COHABIT PsyLing Lab under the supervision of Dr. Togato. I assist with participant recruitment, experiment facilitation, and collaboration with various research tasks in the lab.

I am a senior majoring in Linguistics with an emphasis on Translation Studies and have just been admitted to a Blended Master's Program. My research interests include neurolinguistics and cognitive sciences, particularly how bilingualism and language acquisition interact with neurological processes. I'm also interested in translating and interpreting professionally in legal matters (as an interpreter for courthouses) and using my knowledge to help with AI development in language processing in the future.
